

Special Issue

Corporate Reputation in Times of Accelerated Digitization and Low-Carbon Economy

Message from the Guest Editors

The aim of this Special Issue is to provide space for the publication of high-quality scientific papers focused on the research of selected important factors of corporate reputation in the context of sustainable industry and the low-carbon economy. At a time of accelerated digitization triggered by the COVID-19 pandemic, businesses face a number of significant challenges at the same time. Because of this, effective management of a company's reputation is more challenging than ever before. Social responsibility and sustainability are given the same weight as economic performance indicators in terms of the future prosperity of companies. Green technologies and a low-carbon economy are also one of today's biggest challenges.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
