

Special Issue

Advances in Thermal Energy Storage and Applications

Message from the Guest Editors

This Special Issue aims to present the latest research on new materials, systems, devices and methods for advanced thermal energy storage, as well as the investigations into heat transfer, flow and physical and chemical mechanisms. Research scholars are invited to submit original research, review, and perspective articles on the topics of interest for publication, which include, but are not limited to, the following:

- Configuration design and optimization of high-efficiency thermal storage systems;
- Preparation and optimization of materials with high thermal energy storage density;
- Enhancement of the thermal and chemical stabilities of thermal storage material;
- Thermodynamic and economic analyses of thermal storage systems;
- Control of heat charging and discharging of thermal storage systems and devices;
- Heat transfer control and enhancement of thermal storage devices;
- Single-phase and multi-phase flow control of thermal storage devices;
- Operation strategy optimization of thermal storage systems;
- Smart fault detection and diagnosis of thermal storage systems;
- Advanced simulation and testing approaches.

Guest Editors

Prof. Dr. Shuli Liu

School of Mechanical Engineering, Department of Energy and Power Engineering, Beijing Institute of Technology, Beijing, China

Dr. Panpan Song

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
