

## Special Issue

# Low Carbon Energy Transitions: Today and in the Future

### Message from the Guest Editor

This Special Issue aims to analyze low carbon energy transitions in all sectors, the power sector, transport (by air, land, and water), industries, agriculture, services, and households (especially urban areas). The emphasis is on transitions to renewable energy (biofuels/biomass, geothermal energy, hydropower, marine energy, solar energy, wind energy), as well as nuclear energy, carbon capture and storage and negative emission technologies such as BECCS. The Special Issue aims to address sociotechnical transition pathways, taking into account the diffusion of innovation, how niche innovation can break through at the regime level, the relevance of business models, and the wider role of socioeconomic and political factors to achieve low carbon energy transitions. The Special Issue welcomes both qualitative and quantitative studies, as well as empirical and theoretical contributions, from a range of different disciplines and approaches.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
