

Special Issue

Cleaner Combustion

Message from the Guest Editors

The Special Issue in *Energies* on “Cleaner Combustion” focuses on how the combination of fuel treatment, effective energy extraction, and emission mitigation in combustion can be optimized to reduce the environmental impact that threatens living systems because humans rely heavily on energy for basic necessities and economic development. We refer to “cleaner combustion” as an explicit acknowledgment that any improvements in this critical technology can have a significant global impact because of the ubiquitous nature of combustion. A growing population and growing standards of living have produced explosive growth in energy demand, and the environmental upset has started feeding back.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
