

Special Issue

Development of Core Technologies for Power System Protection and Control

Message from the Guest Editor

The is inviting submissions to a Special Issue of *Energies* on the subject area of “Development of Core Technologies for Power System Protection and Control.” There have been many cutting-edge and emerging techniques for power system protection and control in recent years. Authors are invited to submit original, unpublished papers on all aspects of the core technologies for power system protection and control including but not limited to the following technical areas:

- Microgrid and smart grid;
- HVDC / MVDC / LVDC;
- IEC 61850-based digital substation;
- IED technologies;
- Power system protection and control;
- Wide area protection and control;
- Centralized substation protection;
- Power system analysis and operation;
- Substation automation system;
- Distribution automation system

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
