Special Issue

Advances in Design of Electrical Machines and Simulation of Electromagnetic Fields

Message from the Guest Editors

This Special Issue of *Energies* focuses on the recent advances in the design of electrical machines and the simulation of electromagnetic fields. The simulation of electromagnetic fields is becoming a more and more widely used technique in the design of electrical machines. Contributions to this Special Issue that employ field computational approaches in the design and optimization of electrical machines are welcome. This Special Issue is open to academic and industrial research, and it aims to promote both the development of new methodologies for the design of innovative electrical machines and their implementation in range of engineering applications (e.g., the automotive industry, bio-engineering, medical engineering, renewable energy sources, smart applications, etc.). We would like to invite you to submit your original work to this Special Issue, and we look forward to receiving your outstanding research.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
