## Special Issue

## Hydrogen Energy Technologies: Recent Advances in Production, Storage and Applications—2nd Edition

## Message from the Guest Editors

Today's fast-growing and developing world is facing an increased energy demand and needs alternative energy sources to fulfill it. This is the right time to switch from traditional energy resources to alternative and renewable energy sources which could reduce the emissions of unwanted greenhouse gases and control the global warming problem. Hydrogen has been proposed as an efficient energy carrier, which is capable of replacing fossil fuel-based energy infrastructure due to its cleanliness, unlimited supply, and higher energy content per unit mass. To adopt hydrogen as an energy carrier, several issues, including its clean production, storage, and efficient application, have been addressed during the last few decades. Continuous efforts are being carried out all over the world to make the hydrogen dream come true. This Special Issue will focus on the recent advancements in the field and invite researchers to submit their research articles focusing on the production, storage, and applications of hydrogen.

### **Guest Editors**

Prof. Dr. Ankur Jain

- 1. Centre for Renewable Energy & Storage, Suresh Gyan Vihar University, Jaipur 302017, India
- 2. Natural Science Centre for Basic Research and Development, Hiroshima University, Higashi-Hiroshima 739-8530, Japan

Prof. Dr. Takayuki Ichikawa

Graduate School of Engineering, Hiroshima University, 1-4-1 Kagamiyama, Higashi-Hiroshima 739-8527, Japan

### Deadline for manuscript submissions

## **About the Journal**

### Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

### Journal Rank:

CiteScore - Q1 (Control and Optimization)
