Special Issue

Selected Papers from ERSCP 2017: 18th European Roundtable for Sustainable Consumption and Production

Message from the Guest Editors

The tremendous effort to achieve sustainable energy production and consumption has been acquiring a alobal interest since it includes variable competitive approaches and contradicting preferences of the stakeholders. The technological advances, the socioeconomic parameters involvement, and the environmental impacts, outline a wide range of applicability of novel models within the market diffusion processes. The 18th European Roundtable for Sustainable Consumption and Production (ERSCP2017), which will be held on the island of Skiathos, Greece, 1-5 October 2017, discusses the latest advances of the above issues and attracts the scientific interest of many first order experts in the field. In this sense, this Special Issue aims, to select papers that are subject to a rigorous peer review procedure, and to disseminate the multi-disciplinary dynamics of the discussion outputs, accordingly. We welcome literature reviews, research papers and case studies with a comprehensive interaction with the above mentioned topics and may not be restricted to those presented during the 18th ERSCP2017.

Guest Editors

Dr. Vasileios C. Kapsalis

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
