

Special Issue

Energy Saving Manufacturing System Optimization

Message from the Guest Editors

To meet government environmental laws and consumer demands, manufacturing companies urgently need to retrofit existing production and operational processes to conserve energy and reduce environmental harm. The concept of sustainable supply chain production and operation came into being. It aims to improve resource utilization efficiency and reduce environmental impact as much as possible in the process from product design to raw material procurement, production, transportation, warehousing, recycling, and remanufacturing. Therefore, this Special Issue focuses on optimizing sustainable supply chain manufacturing systems to address energy-saving decisions at different product life cycle stages. We welcome research and review papers from leading researchers and practitioners in academia and industry.

Guest Editors

Dr. Aijun Liu

Department of Management Engineering, School of Economics & Management, Xidian University, Xi'an, China

Prof. Dr. Mingbao Cheng

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
