

Special Issue

The Future of Buildings: Technological Change to Protect Climate and Wellbeing

Message from the Guest Editors

This Special Issue of *Energies* is seeking papers that can demonstrate technologies that can achieve this ambitious goal. Technologies can range from passive to active systems, from hardware developments to intelligent control architectures, and advanced integrated systems. Owing to different climatic challenges in various regions of the world, we specifically seek contributions from different climatic regions. This Special Issue is open to all engineering disciplines and a wide range of research topics addressing mitigation technologies for the efficient decarbonization of the built environment. Review papers are also accepted if their main focus is on advancements with a strong link to practical applications in all sectors.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
