

Special Issue

Advances in Environmental, Economic and Social Assessment of Energy Systems

Message from the Guest Editor

This Special Issue welcomes scientific articles in the field of the life-cycle analysis of energy systems. These articles are expected to include a relevant methodological component by applying a novel methodological framework to relevant energy case studies. These case studies could refer to a technology, a set of technologies, or even a sector (electricity, transport, or the whole energy sector, within a given geographical scope). In addition to original articles addressing the LCA, life cycle costing (LCC), and/or social life cycle assessment (SLCA) of energy systems, works on the combination of life cycle and non-life cycle approaches for the thorough evaluation of energy systems are also welcome.

Guest Editor

Dr. Diego Iribarren

Systems Analysis Unit, IMDEA Energy, Av. Ramón de la Sagra 3, E-28935 Móstoles, Spain

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
