

Special Issue

Electric and Hydrogen Vehicles in Urban Transport Systems: The Current State, Plans, and Technical Requirements

Message from the Guest Editors

All the challenges related to the proper functioning of electric and hydrogen vehicles in urban transport systems are current and interesting research issues. Therefore, this Special Issue is devoted to the current state, plans, and technical requirements for electric and hydrogen vehicles in urban transport systems, as well as being dedicated to promoting the investigation of the latest research in electric and hydrogen vehicles in the context of sustainable smart cities. Any research regarding the analysis of the current status and development of vehicles or their networks, plans and forecasts, calculations, theoretical and practical discussions, as well as case studies are very welcome.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
