

Special Issue

Environmental Sustainability and Energy Economy

Message from the Guest Editors

Climate change and environmental problems are forcing all countries in the world to work together to reverse the situation. Policies worldwide are attempting to minimize, as much as possible, the negative environmental impacts of economic activities, since this is key to detaching economic growth from environmental degradation. Furthermore, the energy sector is one of the main sectors responsible for greenhouse gas emissions; hence, it is under the pressure to take strong and urgent measures to reduce its environmental impact. This Special Issue will contribute to a better and more comprehensive understanding of the connections between energy, the environment, and the economy. Topics to be covered in this Special Issue include, but are not limited to, the following:

- Environmental impacts and sustainability of the energy transition;
- Renewable energy sources;
- Energy efficiency;
- Impact on energy markets and energy prices;
- Stability of supply and energy security;
- Demand-side management;
- Energy and the circular economy.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
