

## Topical Collection

# Feature Papers in Thermal Management

### Message from the Collection Editor

This Topical Collection, “Featured Papers on Thermal Management”, will provide a focused examination of the state-of-the-art thermal management technologies for modern applications such as electric vehicles/aircraft, spacecraft, and hypersonic vehicles. It will cover the thermal requirements, operating conditions, thermal management design, and system configuration for such applications and provide guidance on the setup, instrumentation, and operation of their thermal management systems (TMSs) in the most efficient and effective manner. As the , I cordially invite you to contribute a review or a research article to this Topical Collection. If you are able to contribute, please let me or the Topical (harris.zhou@mdpi.com) know, and we will be happy to provide additional details.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
