

## Special Issue

# Enhanced Oil and Gas Recovery from Conventional and Unconventional Reservoirs

### Message from the Guest Editors

This Special Issue is dedicated to methods and technologies for increasing oil and gas production from conventional and unconventional reservoirs. The need for energy is one of the most pressing issues for the functioning and development of the industry. During times of crisis, there is a reduction in the cost of exploration of new oil and gas fields. In this regard, the issues of intensifying the extraction of resources and increasing the productivity of wells are extremely relevant. In this Special Issue, we aim to highlight the most pressing technical issues that are preventing oil and gas production from accelerating. Significant attention will be paid to the creation of new combined environmentally friendly and efficient technologies for intensifying oil production, which will provide an increase in the oil recovery factor, significant savings in material resources, and a reduction in the impact on the environment, including the diagnostics of oil and gas equipment and an increase in its operational reliability.

---

### Guest Editors

Dr. Roman V. Klyuev

Moscow Polytechnic University, 38 B. Semenovskaya Str., Moscow 107023, Russia

Dr. Nikita V. Martyushev

Department of Advanced Technologies, Tomsk Polytechnic University, 634050 Tomsk, Russia

---

### Deadline for manuscript submissions

closed (3 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
