

Special Issue

Law and Order for Energy Transition: Public Policies at the Crossroads

Message from the Guest Editors

The energy transition poses significant challenges and opportunities for governments, businesses, and communities. As energy policies and regulations play a critical role in the energy transition, it is imperative to understand the legal implications and challenges that arise with the shift towards a more sustainable energy system. This requires interdisciplinary discussions on the legal aspects of public policies for energy transition, covering a range of topics such as the national and international legal frameworks for energy transition, the legal implications of renewable energy sources and energy efficiency, the role of regulation and policy instruments in identifying and addressing the barriers to energy transition whilst implementing and promoting initiatives towards it, the interplay between energy and climate change policies, and the role of the social and the private sector in promoting energy transition. This Special Issue aims to bring together researchers, practitioners, and policymakers to foster discussions and advance knowledge in this field.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
