

## Special Issue

# Energy Consumption in the EU Countries: 4th Edition

### Message from the Guest Editors

Energy is a basic good necessary to fulfill demand for the electricity used in heating systems, cooling systems, and others. Particular attention is paid to renewable energy sources, which provide clean energy, yet the use of traditional fossil fuels is rising because of the increasing demands for energy. Moreover, GHG emissions and other emissions created by greenhouse gasses threaten the environment and have caused a worldwide increase in temperatures, have polluted water resources, and have decreased food security. The only way to solve the problem and reduce GHG emissions is through the production and consumption of clean energy. The above are the possible topics for this Special Issue; however, we encourage authors to send other related works for possible publication. The scope can be extended for other works contributing to energy consumption in general.

### Guest Editors

Dr. Tomasz Rokicki

Prof. Dr. Bogdan Klepacki

Dr. Aneta Bełdycka-Bórawska

### Deadline for manuscript submissions

30 January 2026

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
