Special Issue

Advances in Waste Heat Recovery and Thermal Management

Message from the Guest Editor

This Special Issue of *Energies* brings together cutting-edge research and transformative innovations in waste heat recovery and thermal management technologies. With the transport, industry and energy sectors facing efficiency improvements and sustainable development, waste heat recovery presents an exceptional opportunity to recover otherwise lost energy, reduce emissions and support net-zero goals. From pioneering methodologies in thermoelectric and phase-change materials, organic Rankine cycles and turbocompounding, to state-of-the-art system integration approaches, this Special Issue provide a comprehensive look at how waste heat recovery can help to reduce energy consumption and pollution.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
