

Special Issue

Green Energy Economies

Message from the Guest Editor

Green energy is not only a sustainable source of energy; it is also a driving force for re-shaping sustainable economic modeling. The development of green energy has macroeconomic as well as microeconomic impacts to the whole world. Submissions using empirical and theoretical economic approaches are both welcome for this Special Issue. This Special Issue will deal with the economic analysis of green energy developments and impacts. Topics of interest for publication include, but are not limited to:

- Demand and supply of green energy;
- Cost and benefit of green energy;
- New business models of green energy;
- Green energy and energy security;
- Green energy and environmental protection;
- Green energy and macro-economy;
- Green energy and international trade;
- Green energy and carbon emissions;
- Green energy and energy prices;
- Green energy and industrial development;
- Green energy and public health;
- Green energy and firm competitiveness;
- Green energy and smart communities and cities;
- Green energy and transportation;
- Green energy and eco-tourism;
- Green energy and smart grids

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
