

Special Issue

Interaction Optimization Between Integrated Energy Systems and Power Systems

Message from the Guest Editors

The interaction between integrated energy systems and power systems will be increasingly frequent with the large-scale integration of these systems. The aim of this Special Issue is to collect articles (original research articles and reviews) on interaction optimization between integrated energy systems and power systems. In addition, it will cover the planning and operation of integrated energy systems and power systems, providing scholars in this field with interesting information on this subject.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
