

Special Issue

Beyond Technocracy: Decision-Making Concepts for Energy Efficiency

Message from the Guest Editors

This Special Issue aims to explore and disseminate cutting-edge research and practical applications that redefine decision-making paradigms in the context of energy efficiency. We welcome contributions that delve into conceptual models, empirical studies, or case analyses that highlight innovative, inclusive, and multidisciplinary approaches. Topics of interest for this Special Issue include, but are not limited to:

- Holistic decision-making frameworks for energy efficiency;
- The integration of societal and ethical dimensions into energy policy design;
- Stakeholder-driven decision-making in energy management;
- Adaptive and resilient decision-making approaches to energy efficiency in the face of uncertainty;
- Tools and methodologies for multi-criteria decision analysis in energy systems;
- Management decision-making strategies for energy sustainability in organizations;
- Decision-making in the design and application of information systems for energy management;

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
