

## Special Issue

# High-Efficiency and Low-Emission Internal Combustion Engine Technologies

### Message from the Guest Editors

This Special Issue will deal with technology progress and novel ideas for the efficiency improvement and emission control of spark-ignition and compression-ignition internal combustion engines. The topics of interest for publication include, but are not limited to:

- The Atkinson cycle;
- New concepts in combustion;
- Supercritical fuel spray;
- Hydrogen fuel;
- Ammonia combustion;
- Nanocoating;
- Electronic control;
- Thermal management;
- Emission control;
- Waste heat recovery

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
