

Special Issue

Hybrid Power System Design

Message from the Guest Editor

It is a pleasure to invite you to contribute to this Special Issue on Hybrid Power System Design. Hybrid power systems combine more than one power source to meet the needs of a system. This could include a variety of energy conversion techniques, including solar, wind, electromechanical techniques, etc., as well as a variety of energy storage devices, such as batteries, fuel cells, and supercapacitors. System sizes may be as small as a few milliwatts to over 1 MW. Application areas include off-grid implements, low-power generation for biomedical devices, and transportation. I look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
