

Special Issue

Selected Papers from International Conference on Evolving Cities 2021 (ICEC 2021)

Message from the Guest Editors

Cities are at the centre of both climate and sustainability challenges and provide an important pathway for the plans to transition to net-zero carbon by 2050. They consume around 75% of our energy with a similar value for emissions. This Special Issue will cover pertinent research and development in cities, with particular focus on the built environment, ecology and the quality of life of citizens within and around the cities. To address these complex and interwoven challenges, papers should consider how local, regional or city level contexts impact the implementation and provision of appropriate interventions/technologies for evolving cities. The topics to be covered in the Special Issue should address the following themes:

- Cities and infrastructure;
- Energy and net zero carbon;
- Smart cities and data;
- Energy, behaviour and wellbeing.

Guest Editors

Prof. Dr. AbuBakr S. Bahaj

Dr. Thomas Rushby

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
