

## Special Issue

# The Impact of Crises and Disruption on the Energy Market

### Message from the Guest Editors

Energy is essential for the functioning of the economy and society. However, this resource is often under-appreciated, with its importance only acknowledged when crises and disturbances occur. Even small disturbances affect the functioning of the economy and society, and these often manifest as short-term increases in the prices of energy carriers. On the other hand, crises can have long-term impacts on the energy market. The reasons for such crises may be political (e.g., conflicts and disputes between states, including military operations) or economic, and the problems may concern individual resources (such as oil, gas and hard coal) or the entire energy market. For this Special Issue, we welcome articles discussing local-, national-, country- or global-scale problems in energy markets. We also welcome papers on the impacts of crises and disturbances on the energy market, which may affect the economy and people's social lives.

### Guest Editors

Dr. Tomasz Rokicki

Dr. András Szeberényi

Dr. Aneta Będycka-Bórawska

### Deadline for manuscript submissions

closed (7 November 2024)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
