

Special Issue

Improvements of the Electricity Power System

Message from the Guest Editor

There is inviting submissions for a Special Issue of *Energies* entitled “Improvements of the Electricity Power System”. With the dynamic development of technology and global trends, the existence of virtual power plants seems to be an increasingly economic solution. The goal of the Virtual Power Plant (VPP) is the joint marketing of electricity and the flexibility of the entire group of connected units of energy-producing equipment. Any decentralized entity producing, storing or consuming electricity can become part of a VPP.

Guest Editor

Prof. Dr. Tomasz Popławski

Department of Electrical Engineering, Czestochowa University of Technology, 42-201 Czestochowa, Poland

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
