

Special Issue

Energy Efficiency and Economic Uncertainty in Energy Market

Message from the Guest Editors

We are inviting submissions to a Special Issue which has as its topic the energy efficiency and economic uncertainty in the energy market. This issue covers wide-ranging areas related to energy efficiency, energy savings and consumption, and energy transition across the globe from a multidisciplinary point of view. It also covers topics related to both renewable and non-renewable energy, as well as the environmental and economic impacts of energy use and policy. The Special Issue welcomes as well papers approaching the volatility of the energy markets and risk management in the energy market, as a means to improve energy efficiency. We are looking for original papers (theoretical, empirical and policy-related papers) on innovative contributions in the energy field.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
