

Special Issue

Challenges and Opportunities of Oil and Gas Engineering in a Low-Carbon and Intelligent Future

Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances related to the challenges and opportunities of oil and gas engineering in the context of a low-carbon and intelligent future. Topics of interest for publication include, but are not limited to, the following:

- Integration of renewable energy sources/techniques in oil and gas industry
- Advanced materials for drilling, fracturing and enhanced oil recovery
- Smart drilling, fracturing and production based on artificial intelligence
- Applications of digital twin technology, digitalization and data analytics
- Carbon capture, utilization, and storage (CCUS) technologies
- CO₂ storage monitoring and long-term simulations

Guest Editors

Dr. Lei Hou
Dr. Tianshou Ma
Dr. Daigang Wang

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
