## Special Issue

# Selected Papers From: EARTH 2022-Green Technologies for Waste to Energy and Net Zero CO<sub>2</sub> Emissions

## Message from the Guest Editors

The 16th EARTH Symposium (EARTH 2022) is the premier international congress in the field of resource circulation. Its main objective is to foster knowledge transfer and to exchange experience amongst delegates with diverse academic and industrial backgrounds. The congress offers the ability to learn about the latest advances in resource processing, hydrometallurgy, pyrometallurgy, organic-inorganic material processing, waste-to-energy processes, recycling policies and management, net-zero CO2 emissions, and other important topics related to the environment, waste-to-energy processes, and resource and material recycling. This Special Issue aims to introduce new waste-to-energy and net-zero CO2 emission technologies. Moreover, policy and management strategies for energy savings and net-zero CO2 emissions are also targets. Therefore, the scope and aim of this Special Issue are to introduce recent research on energy and net-zero CO2

## **About the Journal**

## Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

## Journal Rank:

CiteScore - Q1 (Control and Optimization)
