

Special Issue

Energy Policy and Sustainable Energy Resources

Message from the Guest Editor

As the global community confronts urgent challenges related to climate change, resource depletion, and energy security, the need for innovative, evidence-based policies and sustainable energy solutions is more pressing than ever. In particular, the rapidly growing energy demand—driven by digitalization, population growth, urbanization, and technological advancement—poses a significant challenge to achieving a balanced and equitable energy future. Addressing this rising demand requires not only improving energy efficiency and expanding renewable sources but also rethinking consumption patterns and infrastructure planning.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
