

Special Issue

Transition of Renewable Energy Towards Climate Neutrality and Sustainability

Message from the Guest Editor

This Special Issue focuses on renewable energy as a key factor in achieving climate neutrality and sustainable development goals, as well as the challenges it faces. By presenting a diverse range of research topics, we hope to facilitate interdisciplinary dialogue and collaboration, thereby promoting advancements in and broader application of renewable energy technologies.

Topics of interest for this Special Issue include, but are not limited to, the following:

- Renewable Energy Policies and their Economic Impacts
- Innovation in and Applications of Solar Energy Technologies
- Development and Utilization of Wind Energy
- Bioenergy and Renewable Energy Management
- Energy Storage Technologies in Renewable Energy Systems
- Smart Grids and Energy Management
- Global Climate Change and Its Relationship with Renewable Energy
- Social Acceptance and Implementation of Renewable Energy Projects
- Integration of Renewable Energy into Existing Infrastructures
- Technological Innovations in Renewable Energy

Guest Editor

Dr. Guanglei Yang

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
