

Special Issue

Load Modelling of Power Systems II

Message from the Guest Editors

The general theme of this Special Issue is modelling of loads in the context of analysis, control and operation of existing electricity supply networks and future “smart grids”, at all voltage levels and in a variety of applications, including:

- Modelling of recently introduced, new and emerging types of loads;
- Load models of different classes of customers in modern power supply systems;
- Measurement-based and component-based load modelling approaches;
- Time-domain, frequency-domain and other load models and modelling techniques;
- Static and dynamic load models and modelling methodologies;
- Data analytics and data mining for load modelling purposes;
- Load profiling, load decomposition and load disaggregation;
- Modelling and representation of aggregate loads and evaluation of their impact;
- Combined load–generation–storage–network models, e.g., models of “active distribution network cells”, microgrids and virtual power plants;
- Load modelling in related “smart grid” applications, e.g., demand-side management and demand–response schemes, functionalities and services.

Guest Editors

Prof. Dr. Sasa Djokic

Prof. Dr. Jan Desmet

Prof. Dr. Lidija M. Korunović

Prof. Dr. Matti Lehtonen

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
