

Special Issue

Methodologies and Applications for Security and Reliability Assessment of Energy Supply

Message from the Guest Editors

Energy security still remains an important issue in today's world. The importance of energy security is growing along with the growing dependence of states on energy resources and increasing competition for them. This Special Issue aims to collect research manuscripts that demonstrate high-quality methodological or practical approaches focusing on the security and reliability assessment of energy supply.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
