

# Special Issue

## MV and HV Transmission Lines

### Message from the Guest Editors

This Special Issue will deal with novel models and/or methods for power and telecommunications transmission lines. Topics of interest include, but are not limited to:

- Cable modeling (impedance and ampacity);
- Overhead line modeling;
- Faults and insulation analysis;
- Losses;
- Harmonics propagation;
- Power line carrier characteristics and performance;
- Cables earthing and grounding

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
