

## Special Issue

# Machine Learning and Big Data Analytics in Energy Infrastructure, including Economic Implications

### Message from the Guest Editors

The key aim of this Special Issue is to present novel theoretical and applicative research developments covering these topics. Therefore, high-quality, not yet published papers from researchers and professionals working in the field of diagnostics and monitoring of energy infrastructure are expected. The proposed papers can deal with detecting winding, bearing or other mechanical faults of the energy installations, and their power converters by means of online and offline, intrusive and non-intrusive, signal-, model- or data-based methods. The proposed approaches can be based on improvements of the traditional time and frequency domain and discrete wavelet transform analysis or modern artificial intelligence-based methods. Papers covering the advanced diagnosis and monitoring methods are strongly welcomed. Further, those dealing with methods to be directly applied in the industrial environment or with comprehensive industrial experiences in the field will be highly appreciated.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
