

Special Issue

Fault Diagnosis and Control in Renewable Power Systems

Message from the Guest Editors

Dear colleagues, With the increasing proportion of new intermittent energy sources such as wind and solar connected to the power grid, the energy supply structure has undergone significant changes. The fault characteristics of renewable energy systems are becoming increasingly complex. Rapid and accurate fault identification and control is one of the key challenges that urgently need to be addressed. This Special Issue aims to present the most recent advances related to the theory and/or application of the various topics and technologies of renewable power systems. All submissions within the scope of the listed keywords are welcome.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
