

Special Issue

Advances in Numerical Weather Prediction Modelling to Improve Wind Resource and Wind Energy Production Assessment

Message from the Guest Editor

This Special Issue will bridge the knowledge gap between numerical weather prediction modelers (atmosphere physicists, meteorologists, environment experts) and wind farm developers (engineers, investors, and power utilities), who often have very different backgrounds. It is also hoped that this Special Issue will attract valuable review articles that describe the current state of the art and possibly draw future research areas that need to be addressed.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
