

## Special Issue

# Next Generation of Hydraulic Machines

### Message from the Guest Editor

The is inviting submissions to a Special Issue of *Energies* on the subject area of “Next Generation of Hydraulic Machines”. Efficient hydraulic machinery are instrumental to achieving sustainable development and ensuring energy security. The development of advanced numerical tools and techniques has generated new insights on flow physics and phenomena and has facilitated performance improvements under normal and off-design conditions. There is an increased research interest to further improve the environmental profile of hydraulic turbomachinery, increase their operating envelope, extend their life span, and maximize cost effectiveness. This Special Issue deals with numerical modelling and hydrodynamic design techniques applied on the entire specific speed range of hydraulic turbomachines (centrifugal pumps and hydroturbines), in order to optimize their performance and efficiency and/or to achieve specific characteristics, like improved cavitation performance, fish friendliness, etc...

---

### Guest Editor

Prof. Dr. John Anagnostopoulos

School of Mechanical Engineering, National Technical University of Athens, Heroon Polytechniou 9, 15780 Zografou, Athens, Greece

---

### Deadline for manuscript submissions

closed (10 January 2022)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
