

## Special Issue

# Challenges and Prospects of Circular Economy in Low-Carbon Transition

### Message from the Guest Editors

The aim of this Special Issue is to present the current state of the circular economy in the context of the energy transition and to disseminate the practices that are being undertaken to promote its implementation at business and government levels. Topics of interest for publication include, but are not limited to, the following:

- The status of the circular economy and its link to energy transition at all levels of production;
- Future circular economy strategies linked to the energy transition at company, local, regional, and national levels;
- Specific measures to implement a circular economy for energy critical materials at the company level: examples, case studies, etc.;
- Local, regional, and national public policies to support the circular economy in the context of the energy transition, such as fiscal measures, regulations, incentives, subsidies, etc.;
- Specific implementation targets: national strategies and energy system transformation;
- Indicators to measure the circular economy and its link to the energy transition;
- The circular economy and energy transition improvements;
- The circular economy and critical material dependency linked to energy transition.

### Guest Editors

Prof. Dr. María Del P. Pablo-Romero

Department of Applied Economics, Universidad de Sevilla, 41004 Sevilla, Spain

Prof. Dr. Antonio Sánchez-Braza

Department of Applied Economics, Universidad de Sevilla, 41004 Sevilla, Spain

### Deadline for manuscript submissions

closed (30 November 2024)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
