

Special Issue

Power Converter and Its Application in Electrical Grid

Message from the Guest Editor

Prospective authors are invited to submit original contributions for review and publication in this Special Issue on “Power Converter and Its Application in the Electrical Grid”. This Special Issue will deal with novel design and control techniques for power electronics converters and inverters for various electrical grid applications. Topics of interest for publication include but are not limited to:

- Battery chargers;
- Advanced power converter topologies for renewable energy sources;
- Filter design for grid-connected power converters;
- Advanced control methods for grid-connected power converters;
- Application of wide bandgap semiconductor-based power electronics converters in the electrical grid;
- Coordinated control of parallel connected converters;
- Problems associated with meeting the grid requirements, such as EMI, Islanding detection, grid code, virtual inertia, etc.;
- Active filters for harmonic compensation.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
