Topical Collection

Board Members' Collection Series: Clean Coal Extraction and Using

Message from the Collection Editors

Every year, coal energy receives new impetus for development around the world, and the availability of solid fuels plays a decisive role. The key problems of coal energy include high concentrations of anthropogenic emissions during transportation and combustion and low efficiency of power plants. This Topical Collection invites papers with new scientific results in the field of improving the environmental indicators of mining, transport, processing and combustion of coal. Each of the stages of work with solid fuels are extremely important in terms of environmental indicators.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
