

Special Issue

Service Platforms in Smart Grid

Message from the Guest Editor

This Special Issue specifically seeks contributors on the following issues but is not limited to the following:

- Design of service platforms for certain types of smart-grid services;
- Service design, algorithms, or other aspects of flexibility services;
- Service design, algorithms, or other aspects of virtual power plants;
- Service design, algorithms, or other aspects of energy distribution;
- Service design, algorithms, or other aspects of grid reliabilities;
- Service design, algorithms, or other aspects of security and privacy protection;
- Service design, algorithms, or other aspects of renewable energy sources;
- Service design, algorithms, or other aspects of energy exchange market;
- Service design, algorithms, or other aspects of electrical transportation services;
- Service design, algorithms, or other aspects of artificial intelligence services;

Security and privacy issues of service platforms, services, and applications in smart grids.

Guest Editor

Prof. Dr. Minh Shin

Department of Computer Engineering, Myongji University, Seoul, Korea

Deadline for manuscript submissions

closed (20 November 2019)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
