

## Special Issue

# Multi-Phase Flow in Wellbore and Machine Learning Optimization Method

### Message from the Guest Editors

With the development of unconventional oil and gas, the multi-phase flow in wellbore also face new challenges. For example, the multi-phase flow in multi-fracturing horizontal wells needs to be further investigated. On the other hand, the transient flow in the wellbore and the intelligent lift technologies also help to improve the lift efficiency. Thus, researchers can publish relevant studies on the Special Issue. In addition, machine learning also has been widely used in petroleum engineering. There are many researchers working on the machine learning optimization method. This Special Issue aims to present the most recent advances in machine learning, which focuses on reservoirs and wellbore.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
