

## Special Issue

# New Insights into Distributed Energy Systems

### Message from the Guest Editor

This Special Issue will focus on distributed generation systems, utilization of renewable energy sources, power system integration, energy storage systems, AC/DC microgrid, power electronics converter control, electric vehicles, and power system optimization. Both theoretical and experimental works are welcomed. Topics of interest for publication include but are not limited to:

- Distributed energy systems
- Renewable energy
- Wind power generation systems
- Photovoltaic generation systems
- AC/DC microgrid
- Power electronics interface
- Power converter control design
- Power conversion system and quality
- Robust control

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
