

Special Issue

Renewable Energy, Environmental Quality and Sustainability

Message from the Guest Editors

Due to robust economic growth, rapid urbanization, and increased integration into global economies during the last two decades, energy demand has been growing at a spectacular speed in both developed and developing economies. In contrast, sources of energy production are still fossil-fuel-dependent and non-renewable. Therefore, to protect the environment and preserve natural resources, systemic and holistic innovations that include a sustainable supply of resources, the development of highly efficient technical solutions and the adaptation of clean energy systems to the environmental, economic and cultural context is required. This Special Issue titled 'Renewable Energy, Environmental Quality and Sustainability' welcomes full-length research articles, reviews and conceptual papers that explore environmental benefits and economic opportunities brought by renewable energy and its cost and limitation. Both theoretical and practical contributions based on sound theoretical, quantitative and qualitative analysis are encouraged.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
