

Special Issue

Renewable Resources and Biorefineries 2021

Message from the Guest Editors

This Special Issue intends to cover the latest and most promising results related to energy in one of the conference topics: -Bio-based and biodegradable materials - Biocatalysis - Bioenergy - Biorefining - Chemical platform molecules - CO₂ capture and utilization - Food and agricultural wastes - Marine bio-economy - Novel fermentation processes - Nutrient recycling - Polysaccharides - Sustainability analysis - Wood and forestry The Special Issue will include papers presented at the congress, which will go through the rigorous peer revision process of the journal.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief
