

## Special Issue

# Modern Technologies for Renewable Energy Development and Utilization

### Message from the Guest Editors

The development and use of renewable energy has been growing in importance in recent years. Conventional energy resources, such as natural gas and oil, are insufficient to satisfy the demand of the global economy. This results in economic issues and the necessity for measures to ensure energy security. Globally, there has been a positive trend of increasing shares of renewable energy. This development is encouraged by legislation, increased social awareness of ecology and nature conservation, and the advent of new technologies in the energy industry. This Special Issue, entitled “Modern technologies for renewable energy development and utilization”, for the international journal *Energies*, mainly aims at covering original research and studies related to the following (not limited to) topics:

- Renewable energy estimation and utilization;
- Renewable energy systems;
- Electric vehicles role in modern power systems;
- Power electronics in renewable energy systems;
- Integration and control of energy storage systems;
- Microgrids management and control.

### Guest Editors

Prof. Dr. Dongran Song

Prof. Dr. Qingan Li

Prof. Dr. Mohamed Talaat

Prof. Dr. Mingzhu Tang

Dr. Xiaojiao Chen

Prof. Dr. Junlei Wang

### Deadline for manuscript submissions

closed (30 November 2022)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
