Responsible Innovations for Sustainable Energy

Message from the Guest Editors

Innovations and corporate social responsibility (CSR) are commonly recognized among the key contemporary ideas in research and business practice. The concept of sustainable energy has been receiving more and more attention from both scholars and practitioners. The *Energies* journal defines sustainable energy as “a form of energy that meets our today’s demand of energy without putting them in danger of getting expired or depleted and can be used over and over again”. We are inviting researchers who are willing to contribute to the discussion on responsible innovations aimed at the development of sustainable energy solutions to submit papers related to this theme for publication. Various types of articles are invited for publication, including original research (empirical) articles, case studies, review articles, and conceptual articles.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
