

## Special Issue

# Risk Management in the Energy Sector

### Message from the Guest Editors

The aim of this Special Issue, entitled “Risk Management in the Energy Sector”, is to explore, analyse, and discuss the most significant risks impacting the energy industry, as well as the traditional and contemporary methods and strategies of risk measurement and management. The traditional risk management (TRM) approach is used with isolated risks. However, increased complexity and uncertainty associated with the global financial crisis, environmental changes, the geopolitical situation as well as the COVID-19 pandemic have created the need for a comprehensive strategic approach to risks called integrated or enterprise-wide risk management (ERM). ERM is a process that systematically and comprehensively identifies and quantifies different types of risks and manages them effectively to create value for all stakeholders and achieve short-term and long-term goals. The energy sector is no exception here. Due to continuous innovations as well as a dynamic industry structure and environmental changes, the energy sector is exposed to many different risks that are mutually interdependent.

---

### Guest Editors

Prof. Dr. Danijela Miloš Sprčić

Faculty of Economics and Business, University of Zagreb, 10000 Zagreb, Croatia

Prof. Dr. Hrvoje Pandžić

Department of Energy and Power Systems, Faculty of Electrical Engineering and Computing, University of Zagreb, 10000 Zagreb, Croatia

---

### Deadline for manuscript submissions

closed (1 July 2022)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
