

Special Issue

Role of Hydrogen Energy in Renewable Energy Development/Integration and Global Decarbonization

Message from the Guest Editors

Global energy consumption is expected to shift to renewable energy sources in the future, however, it is important to develop more methods and models that can be used to maximize renewable energy utilization. Preliminary research and existing studies have shown that hydrogen production will be integral to renewable energy development as well as to the future of transport sectors. Topics of interest for publication include, but are not limited to:

- All aspects and applications of hydrogen energy
- Hydrogen production (power-to-gas)
- Fuel cells
- Application of hydrogen energy in the transport sector
- Electric Vehicles (BEVs, FCEVs, HFEVs)
- Hydrogen energy storage
- Hydrogen production and renewable energy development
- Future energy planning with hydrogen
- Global decarbonization and hydrogen energy
- Energy/exergy analysis of multigeneration systems integrated with hydrogen production.
- Power Systems
- Hydrogen energy trading and geopolitics

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
